Ink Duct Foil and CPC Consumables

The MasterFOIL range is manufactured to high tolerances from top-grade PET material ensuring:

- Maximum chemical, thermal and mechanical strength for long life without ink duct contamination.
- Only virgin resin suppliers are used - no recycled polyester.
- Tested using both conventional and UV inks.
- Permanently formed for a secure and accurate fit.
- Compact, low volume packaging for safe, easy and cost effective transportation and storage.

Master ink duct end blocks are made of the highest quality engineering grade plastic polymer (POM) which can endure high cyclic stress loading. This ensures high strength and wear resistance translating into a long life in production.

Master ink duct end blocks are precision engineered on modern CNC machines ensuring an exceptional tight fit to the ink duct roller.

Master ink duct end blocks are, wherever required, supplied with tab, screw and scraper cleaner mounted and ready to use.

Recirculation Filters and Air Filters

over 600,000 Master recirculation filters sold!

RECIRCULATION FILTERS

Code: FILTER01

For Royse systems. Also widely used on all types of Heidelberg, Komori and Roland presses where a hose can easily be fitted to return-flow.

Code: FILTER02

For Master Flow systems. Also used on some Royse systems.

Code: FILTER03

For Technotrans systems (old style)

Code: FILTER04

For Technotrans systems (new style)

We work hard to produce high quality, high value products which enable presses everywhere to run more efficiently.

Our long line of replacement and custom designed re-circulation filters are tough, long lasting – and guaranteed to meet or exceed every printer's expectations.

Master filters of which several models are made with multi-layer design, remove most contaminants ensuring a consistently cleaner fount, improving accurate monitoring of fount conductivity, thereby reducing down time and giving long press runs and less maintenance.

Made in high quality felt, polyester or nylon, Master recirculation filters are carefully fabricated and come with a wide assortment of fittings ensuring ease of installation and compatibility with most press models on the market.

All Master filters undergo extensive field testing and provide a high contaminant loading and long service life.

Packing: 950 grams (2.1 lbs)/can - 12 cans/box

LubeClean is an exceptional product that has taken the graphics industry by storm. Formulated to prevent friction burn-up of ink rollers on idle printing units during printing, LubeClean also gently deep cleans and rejuvenates the rollers!

LubeClean cleans off quick and easy at the end of the shift and contrary to other products on the market it has a very pleasant fragrance.

LubeClean does not harm plates or blankets and works with both conventional and UV ink.

Instant benefits:

- Lubricates AND deep cleans inking rollers
- Will not harm plates or blankets
- Quick and easy to clean off at the end of shift
- Pleasant fragrance during use
- Works with conventional and UV ink
- Non-caustic
- Non-toxic
- Non-flammable

Wash-up Blades

Our wash-up blades are manufactured to fine tolerances for perfect fit on old and new presses alike. They are resistant to chemical attack from inks and solvents and are highly efficient and durable.

A perfect profile ensures excellent wash-up results each time, reducing the amount of wash-up chemicals used and reducing down-time on the press.

Our blades are available for the vast majority of offset sheet-fed, web and continuous form presses in either metal/rubber, metal/urethane, rubber (EPDM), plastic or Tufnol format. Each individual blade is presented in a plastic sleeve with the machine reference for easy identification.

- Size and style specification guaranteed
- High resistance to wear
- Accurate fit first time - no adjustment required
- Corrosion-proof steel
- Chemical resistant rubber and plastic
- Individually packed in protective sleeve
- Moulded rubber tip chemically bonded - no breakdown

Check Page 108 for flat suckers

World-wide distribution of rubber suckers for the printing and packaging industry

The Master rubber sucker range has been developed over decades and is now distributed world-wide. Produced to original manufacturers' specifications our rubber suckers cope easily with the demands of to-days high speed printing presses.

Shaped Suckers – Alphabetically listed

On the following pages you will find, alphabetically listed, shaped suckers for nearly every press in the printing industry. We are continuously adding suckers for new or less known machine models so if you cannot find the rubber sucker you need please enquire. There may be times when the color of the sucker supplied does not match the picture in the leaflet, however the quality and material used will always remain unchanged.

Flat Suckers – Quick and easy identification system

All flat suckers are color coded according to thickness and the product code incorporates all dimensions as well as the color of the sucker enabling quick and easy identification:

Example:

Flat Sucker Code **S2412050** Color: Orange
 Inside Dia. (mm) Outer Dia. (mm) Thickness (mm)

Color code:
Our rubber suckers are colored according to thickness
